

Journal of Mathematical Biology

Volume 40 (2000)

Managing Editors

O. Diekmann, Utrecht
K.-P. Hadeler, Tübingen
A. Hastings, Davis, CA

Editorial Board

R. Bürger, Wien
G. B. Ermentrout, Pittsburgh, PA
M. Gyllenberg, Turku
Y. Iwasa, Kyushu
M. Lewis, Salt Lake City, UT
M. Möhle, Mainz
C. Neuhauser, Minneapolis, MN
T. J. Pedley, Cambridge
A. Pugliese, Povo di Trento
L. Segel, Rehovot
S. Tavaré, Los Angeles, CA

Springer

Journal of Mathematical Biology

Founded and edited in 1974 by H. J. Bremermann, F. A. Dodge Jr., and K.-P. Haderl.
Currently edited by K.-P. Haderl (since Vol. 9, 1980), A. Hastings (since Vol. 34, 1995), and
O. Diekmann (since Vol. 38, 1999).
Honorary Editor: S. A. Levin

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

An author may make an article publishing by Springer-Verlag available on a personal homepage provided the source of the published article is cited and Springer-Verlag is mentioned as copyright holder. Authors are requested to create a link to the published article in LINK, Springer's Internet service. The link must be accompanied by the following text: The original publication is available in LINK at <http://link.springer.de>. Please use the appropriate URL and/or DOI for the article in LINK. Articles disseminated via LINK are indexed, abstracted and referenced by many abstracting and information services, bibliographic networks, subscription agencies, library networks, and consortia.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publishers makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA. Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0303-6812, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents of Volume 40 (2000)

- Alvarez LHR: On the option interpretation of rational harvesting planning 383
Alvarez LHR: On the comparative static properties of the expected population density in the presence of stochastic fluctuations 432
Andrésén P → Bees MA
Arino O → de Gaetano A
- Bees MA, Andrésén P, Mosekilde E, Givskov M: The interaction of thin-film flow, bacterial swarming and cell differentiation in colonies of *Serratia liquefaciens* 27
Behncke H: Periodical cicadas 413
Bonneuil N, Saint-Pierre P: Protected polymorphism in the two-locus haploid model with unpredictable fitnesses 251
Bressloff PC: Traveling waves and pulses in a one-dimensional network of excitable integrate-and-fire neurons 169
Broom M: Patterns of evolutionarily stable strategies: the maximal pattern conjecture revisited 406
Brownell WE → Ratnanather JT
Byrne HM → Jones AF
- Calsina A, Mazón JM, Serra M: A mathematical model for the phase of sexual reproduction in monogonont rotifers 451
Chaplain MAJ → Feltham DL
Coutinho FAB → Lopez LF
- de Gaetano A, Arino O: Mathematical modelling of the intravenous glucose tolerance test 136
Dickinson RB: A generalized transport model for biased cell migration in an anisotropic environment 97
Dold JW → Jones AF
- Edelstein-Keshet L, Ermentrout GB: Models for spatial polymerization dynamics of rod-like polymers 64
Editorial 1
Ermentrout GB → Edelstein-Keshet L
- Feltham DL, Chaplain MAJ: Analytical solutions of a minimal model of species migration in a bounded domain 321
Gibson JS → Jones AF
- Givskov M → Bees MA
Gourley SA → Schley D
- Herbert J, Isham V: Stochastic host-parasite interaction models 343
Hethcote HW, van den Driessche P: Two SIS epidemiologic models with delays 3
- Isham V → Herbert J
- Jang SR-J: Dynamics of variable-yield nutrient-phytoplankton-zooplankton models with nutrient recycling and self-shading 229
Jones AF, Byrne HM, Gibson JS, Dold JW: A mathematical model of the stress induced during avascular tumour growth 473
- Lessard S → Rocheleau G
Lopez LF, Coutinho FAB: On the uniqueness of the positive solution of an integral equation which appears in epidemiological models 199
- Mazón JM → Calsina A
Mosekilde E → Bees MA
- Percus JK, Percus OE, Perelson AS: Random binding of dimers to chains 278
Percus OE → Percus JK
Perelson AS → Percus JK
Popel AS → Ratnanather JT
- Ratnanather JT, Popel AS, Brownell WE: An analysis of the hydraulic conductivity of the extracisternal space of the cochlear outer hair cell 372
Redheffer R: Generalized monotonicity, integral conditions and partial survival 295
Rocheleau G, Lessard S: Stability analysis of the partial selfing selection model 541
- Saint-Pierre P → Bonneuil N
Schley D, Gourley SA: Linear stability criteria for population models with periodically perturbed delays 500
Schneider KR, Wilhelm T: Model reduction by extended quasi-steady-state approximation 443
Serra M → Calsina A

van den Driessche P \rightarrow Hethcote HW
van den Driessche P, Watmough J: A simple
SIS epidemic model with a backward
bifurcation 525

Watmough J \rightarrow van den Driessche P
Wilhelm T \rightarrow Schneider KR
